Watch phone system activity and easily control your calls with the FacetPhone user interface on your Mac. With a soft phone, make your Mac your phone.

Your iPhone® or iPad[®] can become an extension on the FacetPhone system.

FacetPhone is an exciting VoIP IP-PBX phone system that puts your telephone user interface right where it belongs ... on your Mac!

FacetPhone is designed and built from the ground up as an IP-based telephone system. FacetPhone makes advanced PBX features, normally only available to large enterprise customers, now affordable for small to medium size businesses. Built entirely with industry standard components and running on the Mac OS X operating system, FacetPhone is reliable, robust, scalable and flexible.

FacetPhone on the Mac supports:

- IP Phones, Soft Phones & iPhones
- Graphical User Interface
- Visual Voice Mail
- Presence Management
- Unified Communications

- Multiple Auto Attendants
- ACD Queues and Contact Centers
- Computer Telephony Integration (Address Book)
- Branch Office & Teleworker Integration
- All Dial Tone Options (POTS, T1, SIP Trunks, Skype Connect[™])

Let us show you how your Mac can become your business phone system. Visit us in booth 947 by the Macworld Live Stage
